ADVANCED RESPONSIBLE AI TRAINING

Innovate With Trust

Your teams are already using generative AI, but are they prepared for the risks?

From data leaks and copyright infringement to algorithmic bias and brand-damaging "hallucinations," the threats are real.

Our Responsible AI (RAI) Training service helps your workforce identify, understand, and control these risks before they become crises.

63%
Of employees have seen other employees using AI inappropriately

What We Offer

Our expert cross-disciplinary team can help your leadership get quickly up-to-speed with the most important concepts, news, and practices for delivering and using generative AI in a responsible way.

Over the course of one week, we will work with you to develop customized training plan including:

- An impactful executive briefing for your team or organization to outline the sources of AI risks and what to do about them.
- Examples of successful, safe generative AI technologies and practices that empower teams to leverage AI with confidence.
- A hands-on learning workshop to explore a generative AI use case and apply responsible AI principles.

Key Outcomes & Deliverables

You'll come away empowered to unlock the potential benefits of AI technology while protecting your company, your customers, and your reputation.

In addition, you'll get:

- Presentation materials and recordings.

- A quick reference guide for RAI principles to share with your organization.
